

# **WEST SHORE ROAD UPDATE**

## **Phase III**

**April 3, 2017**

The Third and final phase of the West Shore Road project is under way. The plans for the project are posted on Mill Necks's website ([www.millneckvillage.com](http://www.millneckvillage.com)). The plans include landscaping in low native plants where there is room to do landscaping. The early part of the project involves putting drainage in for the roadbed and the utilities underground as was done in the previous two phases.

- **PSE&G is putting new poles for the streetlights on the west side of the road.**
- **They continue to make good progress on the steel sheathing installation.**
- **National Grid was welding joints on their new transmission lines.**
- **The curbing on the east side of the road is not expected to begin for a few weeks at the same time they will be installing the cap on the steel sheathing.**
